

Erratum: corrected data

In order to be transparent and honest with our supporters, we would like to point out a mistake in calculating the number of beneficiaries helped and the number of trees planted in our Annual Report and Accounts 2014-15. We, inadvertently, included *target* rather than *actual* numbers for a new project in Niger that had commenced during the year.

This has subsequently been corrected in our Annual Review 2014-15, and we apologise for the error.
